

## Childhood diseases in the early 20<sup>th</sup> century (as revealed by the Kildwick School log book – 1907 to 1920)

These days, thanks to the widespread use of antibiotics and early-years inoculations, most childhood diseases are kept largely under control. They are irritants (albeit sometimes painful for individuals) rather than dangerous, or even life-threatening.

However, in the early years of the 20<sup>th</sup> century, this was not the case and the appearance of an infectious disease in a single child could quickly result in it spreading through the whole community. Sometimes with dangerous or even fatal consequences.

The Kildwick School log book for the period 1907 to 1920 shows how common these diseases were and the steps that the school and the local authority could take to prevent them spreading. Children could be excluded if they had siblings who were infected and, in the event of a serious outbreak, the Medical Officer of Health could order the school to be closed.

The log also reveals the start of what would become universal health care: with the gradual appearance of school medical inspectors and dentists, and a nurse examining children for head-lice.

### 1907

- |                           |  |
|---------------------------|--|
| January 11 <sup>th</sup>  | 13 children have been absent all week owing to illness; one of these due to mumps and two to measles.  |
| February 12 <sup>th</sup> | One boy was obviously unfit to remain at school, so was taken home by the Monitor.   |
| March 15 <sup>th</sup>    | Six children have been absent all the week. Two of them are suffering from eczema.<br><i>(Perhaps a polite way of saying ringworm ?)</i>   |
| August 26 <sup>th</sup>   | Re-opened school today after four weeks' holiday. Three children are excluded owing to scarlet fever and another case has proved fatal.<br><i>(This was seven-year-old Helen Clough of Starkey Lane, Farnhill. Her teacher attended the funeral and the school sent a wreath.)</i> |
| August 30 <sup>th</sup>   | Five children have been excluded all the week owing to infectious illness.<br><i>(Presumably, the outbreak of scarlet fever was continuing ?)</i>  |
| September 6 <sup>th</sup> | Five children have been absent all the week owing to infectious illness.<br><i>(Still scarlet fever ?)</i>   |
| October 4 <sup>th</sup>   | One boy is ill with Scarlet Fever. His brother is consequently excluded from school.   |

## 1908

- February 7<sup>th</sup> Two boys have been excluded all week owing to an ailment of the skin which a local doctor states to be infectious.  
*(Ringworm perhaps ?)*
- March 6<sup>th</sup> One child is reported to be suffering from Scarlet Fever.
- March 13<sup>th</sup> One child is away owing to Scarlet Fever and another owing to measles.
- April 27<sup>th</sup> Attendance shows improvement, but two children are absent owing to a case of chicken-pox.
- August 27<sup>th</sup> Three children have been sent home, because they are suffering from some skin ailment.
- September 4<sup>th</sup> The attendance this week is adversely affected by the absence of three children owing to skin ailments and two owing to Scarlet Fever.
- September 16<sup>th</sup> Dr. Stansfield from the Public Health Department, Wakefield visited the school this afternoon and explained the procedure for Medical Examination.
- September 23<sup>d</sup> Notices were sent out today to the parents of children who are to be medically examined.
- October 1<sup>st</sup> Mr. Stansfield, Medical Officer visited the school today and examined about 17 of the scholars. Notes were sent to the parents of children with defective eyesight, etc.
- October 16<sup>th</sup> Three children are excluded from school owing to two cases of Scarlet Fever.
- October 19<sup>th</sup> Five fresh cases of Scarlet Fever are notified this morning and forty children are absent from school owing to illness, etc. The fever cases have been reported to the School Attendance Officer and the Sanitary Inspector also.
- October 21<sup>st</sup> School closed today by order of the Medical Officer of Health.  
Duration of closing – Four weeks commencing Oct 20<sup>th</sup> 1908.  
The school was fumigated this afternoon and has since been thoroughly cleaned and colour washed.
- November 16<sup>th</sup> Reopened school after closure for four weeks. No. present 102  
ten children are still in hospital with Scarlet Fever.  
*(Right up to the Xmas break, the headmaster noted a large number of pupils "absent all week due to illness".)*

## 1909

- January 11<sup>th</sup> School reopened today after a fortnight's holiday. No. present 107  
Seven children are still absent due to Scarlet Fever. Four of these should return to school next week.
- February 3<sup>rd</sup> Dr. H. Stansfield, Medical Officer, visited the school today and examined 12 of the children.
- March 1<sup>st</sup> Twenty-five children are away from school today suffering from influenza colds, etc.  
*(The headmaster would subsequently report 17 children away all week and 25 absent on Friday.)*
- May 19<sup>th</sup> Dr. H. Stansfield visited the school today and examined a number of the children
- September 17<sup>th</sup> James Ernest Sharpe, a scholar of this school, died during the week. The teachers and scholars sent two crosses of flowers to the grave.  
*(No cause of death is recorded in the school log and, generally, attendance levels seem to have been high in this period. However, it may be significant that the school ceased swimming lessons at Glusburn Baths until the following summer.)*
- October 18<sup>th</sup> Six children are away from school today, suspected to be suffering from whooping cough. A number of others are away owing to colds. Sixteen infants are absent today.
- October 21<sup>st</sup> Several more infants are away today with colds.
- October 22<sup>nd</sup> Eighteen children have been absent all week owing to whooping cough, etc.
- November 3<sup>rd</sup> Dr. F.E. Atkinson, MOH, visited the school this afternoon and noted the number of children absent owing to whooping cough viz. 21.
- November 4<sup>th</sup> Received a personal weighing machine and a measuring standard for use in connection with Medical Examination of school children.
- November 5<sup>th</sup> Twenty eight children have been absent all week owing to whooping cough, etc. Twenty five of these belong the Infant's Class.  
*(The same number of absentees was noted the following week.)*
- December 22<sup>nd</sup> Dr. H. Stansfield, School Medical Officer, visited the school today and examined a number of children. Dr. Adams (C.M. Dept.) also came in the afternoon.

## 1910

- January 12<sup>th</sup> The children who have been medically examined were weighed today.
- May 25<sup>th</sup> Dr. H. Stansfield, School Medical Officer, visited the school today and examined 14 children.
- May 27<sup>th</sup> One child is reported to be suffering from measles and another suspected to be suffering from chicken pox.
- June 13<sup>th</sup> Fifteen children are absent this morning who are suspected to be suffering from Measles and three others are away due to brother's illness. The Attendance Officer was duly notified.
- June 17<sup>th</sup> Thirty one children are now excluded owing to measles in their homes. The Medical Officer of Health has been informed.  
The School Attendance Officer visited on Thursday and noted names of absentees.  
*(The same number of absentees was recorded in the following week. Miss Sugden, one of the teachers, was also reported to be ill.)*
- July 22<sup>nd</sup> Fourteen children have been absent all week. A number of these are away owing to measles.
- October 7<sup>th</sup> In the Infants' Class two children are away owing to ringworm and one owing to whooping cough.
- November 18<sup>th</sup> Three children have been away all week and are suspected to be suffering from Whooping Cough.
- November 23<sup>rd</sup> Dr. H. Stansfield, School Medical Officer, visited the school today and medically examined 18 children. Several parents attended.
- December 9<sup>th</sup> There are four cases of whooping cough and one of measles.

## 1911

- February 10<sup>th</sup> ... there are three cases of sores.
- April 29<sup>th</sup> Medical inspection today by Dr. Douglas (W.R. Medical Inspector). Several of the parents attended.
- December 8<sup>th</sup> Recreation Interval was taken this afternoon at 2:30pm in order that the children could attend the funeral of their little school-fellow, Lawrence Shuttleworth, who has died suddenly from blood-poisoning.
- December 21<sup>st</sup> Dr. A. Philip, School Medical Officer, visited the school and examined several children. He afterwards visited the various classes.

## 1912

- January 29<sup>th</sup> John Richardson, a five year old scholar at this school died in the Fever Hospital Skipton on Sunday, from a severe attack of diphtheria. Two children suffering from cold and sore throats were sent back home this morning.
- January 31<sup>st</sup> Dr. Atkinson, Medical Officer of Health, visited the school this afternoon and examined the throats of a number of children.  
*(Seven children were excluded with immediate effect and, the following day, a further 22 were excluded "until the return of the tests".)*
- February 5<sup>th</sup> The tests taken by Dr. Atkinson (M.O.H.) proved to be "negative". The children previously excluded were re-admitted today. A number are still absent due to influenza and colds.
- April 17<sup>th</sup> Twenty five who are to be medically inspected on Friday next were measured and weighed today.
- April 18<sup>th</sup> Three children absent this morning are suspected to be suffering from Chicken Pox. Two others with rash on their bodies have been sent home.
- April 19<sup>th</sup> Eight more children are absent this morning suspected to be suffering from Chicken Pox.  
Dr. A. Philip MD visited the school this morning and medically examined 17 of the children. He also excluded two children suffering from Chicken Pox.
- April 26<sup>th</sup> Eighteen children have been absent all week owing to Chicken Pox.
- May 2<sup>nd</sup> The total of absentees owing to chicken pox has now reached thirty.  
*(This was the peak of the outbreak which would continue for a further two weeks.)*

## 1913

- January 6<sup>th</sup> Two boys are excluded suffering from Ringworm.
- February 28<sup>th</sup> Attendance this week has been low. Three children are absent suffering from Ringworm, and a number of others have severe colds.
- March 14<sup>th</sup> Dr. A. Philip, School Medical Officer, visited the school today and examined fifteen children. He also excluded from school two children suffering from Glandular Swellings.
- August 29<sup>th</sup> ... two are absent owing to ringworm sores.
- October 3<sup>rd</sup> A number of the children have been absent all week owing to colds. Some have glandular swellings.

October 15<sup>th</sup> Seven children have been absent all week. Five of these are suffering from mumps.

October 24<sup>th</sup> Five children have been absent all week suffering from mumps.

November 14<sup>th</sup> Ten children have been absent all week owing to mumps, etc.

November 25<sup>th</sup> Dr. A. Philip, School Medical Officer, visited the school today and inspected twenty-two scholars, in addition to special cases.

December 5<sup>th</sup> Eight children have been absent all the week owing to illness, chiefly cases of mumps.

December 8<sup>th</sup> Seventeen children are absent this morning suffering from mumps or severe colds.

December 12<sup>th</sup> There are nine cases of mumps.

## 1914

January 5<sup>th</sup> Three children are still absent suffering from mumps.

June 29<sup>th</sup> Four children are away from school today suffering from measles and one child is excluded because of his brother's illness.

July 3<sup>rd</sup> Eight children are now away owing to measles. They are chiefly infants and young boys.

July 7<sup>th</sup> Twenty one children are absent this morning owing to measles.

July 10<sup>th</sup> 42 scholars were absent from school today owing to measles in their homes. The School Dentist came today and attended to the teeth of four children. Seven who should have received attention were absent.  
*(This is the first mention in the log of a "school dentist".)*

July 13<sup>th</sup> School closed – until midsummer holidays.  
Dr. Atkinson, Medical Officer of Health, notified Divisional Clerk of closure.

August 28<sup>th</sup> All the children seem to have recovered from measles.

November 26<sup>th</sup> Nurse Stoddard visited the school today and inspected the hair etc. of a number of scholars.  
*(This is the first mention in the log of "nitty Nora, the head explorer".)*

November 27<sup>th</sup> Nurse Stoddard again visited the school and examined about 50 children.

December 17<sup>th</sup> Nurse Stoddard visited the school today and saw a number of girls and one boy. A distinct improvement in the state of the children's hair is resulting from these visits.

## 1915

- May 14<sup>th</sup> Nurse Stoddard (WRCC) visited the school this morning and inspected a number of children. She pointed out to a number the importance of keeping their hair tidy.
- July 1<sup>st</sup> The School Dentist, Mr. Raeburn, came today and attended to the teeth of a number of children. The parents of 18 children had written accepting treatment; 8 declined and three took their children to their own dentist.
- July 2<sup>nd</sup> Mr. Raeburn again attended, at the Parish Room, and extracted children's teeth, etc. 10 children were dealt with.
- July 19<sup>th</sup> Dr. Brewer, the school Medical Officer, visited the school this afternoon and examined a number of children.
- November 5<sup>th</sup> ... six being away suffering from mumps.
- November 17<sup>th</sup> Nurse Stoddard (WRCC) visited the school and inspected a number of children.
- November 26<sup>th</sup> Several infants have been absent this week owing to Whooping Cough and Mumps.
- December 3<sup>rd</sup> Seventeen children have been absent all the week owing to Whooping Cough, etc. A number of others have been absent part of the week
- December 10<sup>th</sup> Thirty children have been absent all week owing to whooping cough.
- December 16<sup>th</sup> The Head Teacher received the following notice this morning from the Divisional Clerk: "The Infants Division is to be closed; order following..."
- December 24<sup>th</sup> School closed at 11:30am today for Xmas Holidays ... The usual Christmas dinner for children from houses with large families etc. was served. Thirty-four children were invited but ten were unable to come owing to Whooping Cough. Gifts were sent to these.

## 1916

- January 10<sup>th</sup> A number of the Infants are still absent owing to Whooping Cough.
- January 21<sup>st</sup> Eleven children have been absent all week owing to Whooping Cough, etc. These are infants and children in the lower classes.
- January 27<sup>th</sup> Seventeen children have been absent all week owing to Whooping Cough etc. There are also two cases of Ringworm, and one other girl is seriously ill in a nursing home.  
*(The outbreak of whooping cough continued into March. One of the teachers was also absent for an extended period with laryngitis.)*

March 24<sup>th</sup> There are two cases of Chicken Pox and several of bronchitis following Whooping Cough.

*(From about this point the log largely ceases to record weekly absences and illnesses. Only major outbreaks are recorded.)*

May 17<sup>th</sup> Nurse Stoddart (WRCC) visited the school today.

September 4<sup>th</sup> S. Jacob Esq. MA LLD JP visited the school this afternoon and gave the older children a talk on "Health and the Prevention of Consumption".

November 2<sup>nd</sup> Mr. Raeburn, School Dentist, visited the school today.

November 10<sup>th</sup> Nurse Stoddart called at school today to see several children.

November 12<sup>th</sup> Dr. Brewer, School Medical Officer, visited the school this morning and examined a number of infants and nine older children.

December 1<sup>st</sup> Dr. Brewer, School Medical Officer, visited the school today to see and examine H. Mosley.

## 1917

September 4<sup>th</sup> Nurse Stoddart (WRCC) visited the school today to see certain children.

October 15<sup>th</sup> Ten children are absent this morning owing to cases of Chicken Pox in their families. School Attendance Officer called and took particulars.

October 29<sup>th</sup> 29 children are away from school today and 21 are suspected to be suffering from Chicken Pox. Five others are absent owing to brothers' and sisters' illness.

October 30<sup>th</sup> Four more children have got chicken pox. Three were attending school and had to be sent home.

November 2<sup>nd</sup> Dr. Atkinson, Medical Officer of Health, visited the school this afternoon and noted absences due to Chicken Pox.  
Twenty seven children have been absent all week owing to Chicken Pox and relative's illness.

November 5<sup>th</sup> Infants Class closed today for three weeks on the order of the Medical Officer of Health. Children to re-assemble November 26<sup>th</sup>.

November 9<sup>th</sup> Fourteen children have been absent all week owing to Chicken Pox.

November 30<sup>th</sup> *(The infants have returned after the three-week closure period.)*  
Eighteen children have been absent all week owing to illness, chiefly Chicken Pox. Fifteen of these are infants.

## 1918

- January 23<sup>rd</sup> Mr. Raeburn, School Dentist, visited the school this afternoon and saw 49 children.
- February 1<sup>st</sup> Nurse Stoddart (WRCC) visited the school this afternoon.
- February 11<sup>th</sup> Twelve children were out of school part of the morning and afternoon session to attend the Dental Clinic at the Glusburn Council School today.
- February 12<sup>th</sup> Seven children attended the Clinic today to receive Dental Treatment.
- July 11<sup>th</sup> Mrs S.E. Lawson (uncertificated assistant) is absent today owing to an attack of Influenza. 34 children are also absent.
- July 12<sup>th</sup> 56 children are away today owing to illness – chiefly influenza.  
School closed from today for one week by order of the Medical Officer of Health.
- November 1<sup>st</sup> Twenty children are absent today owing to influenza, colds etc.  
School Attendance Officer called and took particulars. Forms re precautions in influenza epidemics distributed to children.
- November 5<sup>th</sup> School closed today and throughout the week on the recommendation of the Medical Officer of Health.
- November 15<sup>th</sup> Eighteen children have been absent all week owing to influenza, etc. Other children have been absent part of the week.
- November 18<sup>th</sup> School closed by order of the Medical Officer of Health owing to prevalence of influenza. To remain closed for two weeks, viz. 2<sup>nd</sup> December.

## 1919

- January 6<sup>th</sup> Four children are [still] away due to Scarlet Fever; two boys are excluded suspected to be suffering from Chicken Pox.
- February 12<sup>th</sup> 45 children absent today owing to colds and influenza. 2 absent owing to German Measles.  
Dr. Brewer (School Medical Officer) called this afternoon to see children who have been suffering from Ringworm.
- February 14<sup>th</sup> The Head Teacher (Thomas Appleby) was absent today suffering from severe cold and sore throat.
- February 17<sup>th</sup> School closed today for two weeks by order of the Medical Officer of Health.
- March 24<sup>th</sup> Dr. Brewer (School Medical Officer) visited the school this and examined several children.

- July 2<sup>nd</sup> Dr. Charles Smith, School Medical Officer, visited this afternoon and examined 20 of the children and inspected the rest. He certified that Fred Wilcock and Marion Sugden are not in a fit state of health to attend school and advised their parents to take them to be examined by their own doctors and by the Tuberculosis Officer at Keighley.
- August 23<sup>rd</sup> The Head Teacher received the following communication from the Divisional Clerk. "Dear Mr. Appleby, I have a letter from Dr. Atkinson this morning and he advises deferring the opening of the school for another week. Closing order to follow. He says there are several cases of measles at Farnhill."
- November 14<sup>th</sup> Dr. C. Smith (School Medical Inspector) and Nurse Stoddart visited the school this morning and inspected sixteen children.
- November 28<sup>th</sup> A number of the infants are still suffering the after-effects of measles, and in consequence their attendance is not good.

## 1920

- May 17<sup>th</sup> Owing to a number of cases of mumps the attendance this week has been low.
- May 19<sup>th</sup> There are a number of fresh cases of mumps. There are 13 cases of mumps and 9 other children excluded as a consequence. There are also 6 other children absent owing to influenza, sore throat, etc.  
The Correspondent (Rev. C.E.V. Hodge) telephoned Dr. Atkinson, Medical Officer of Health. The latter recommended the closing of the school and promised to send an order later.  
The order duly arrived closing the school until June 7<sup>th</sup>.
- June 7<sup>th</sup> School re-opened today after closure for mumps. There are still 12 cases of mumps and 11 other children excluded due to brother's or sister's illness.
- June 11<sup>th</sup> 17 children have been away from school owing to the fact that they or their sisters or brothers are suffering from mumps.
- June 18<sup>th</sup> The number of cases of mumps is lessening but 13 children are still away from school owing to this and other illnesses.
- November 22<sup>nd</sup> School closed today by order of Dr. Atkinson, Medical Officer of Health, owing to outbreak of diphtheria. To remain closed one week.
- November 29<sup>th</sup> School re-opened after being closed for one week owing to infectious illness. Dr. Atkinson came this morning, took swabs from the throats of the scholars and closed the school for the rest of the week.
- December 6<sup>th</sup> The school re-opened this morning. The Medical Officer reported that, of the 90 swabs taken, only 1 has given a positive result; viz: Kenneth Simpson.
- December 14<sup>th</sup> Dr. C. Smith, School Medical Officer, accompanied by Nurse Stoddart visited the school today and examined 27 of the children. He recommended the exclusion of Marion Sugden owing to lung trouble.

## 1921

- January 13<sup>th</sup> There is [another] case of diphtheria (Kathleen Snowden) and three children who have come into contact are also excluded from school.
- January 14<sup>th</sup> Three children are absent owing to fear of infection.
- January 28<sup>th</sup> Another case of diphtheria has been reported today (Annie Whiteoak).
- February 18<sup>th</sup> The seven children who have had diphtheria are all reported to be clear. Those who were in hospital have returned.
- April 12<sup>th</sup> Dr. W.B. Watson, School Medical Officer, accompanied by Nurse Stoddart visited the school today and examined about 17 children.
- July 18<sup>th</sup> There are several fresh cases of whooping cough and two or three children are excluded by doctor's orders.
- August 22<sup>nd</sup> School re-opened today after four weeks holiday. Ten children are still absent suffering from whooping cough.
- October 28<sup>th</sup> Dr. W.B. Watson, School Medical Inspector, visited the school today and inspected twenty scholars. Nurse Stoddart also attended.  
Dr. Watson noted one case of an infant who is tongue-tied.
- November 9<sup>th</sup> Dr. W.B. Watson visited the school to examine certain special cases.
- November 21<sup>st</sup> The three children of the gypsy van-dweller Mr. S. Grey left the school today. The school doctor reports that in physical stamina and cleanliness they are quite up to the standards of the other children.
- December 2<sup>nd</sup> Dr. Lawrence (School Medical Officer) called to examine Robert Banks with regard to the latter being employed in delivering papers.  
*(The log does not report whether or not young Robert was found to be fit enough to be a paper-boy.)*
